

Do I Need To Quarantine?

If you have been in close contact (within 6 feet or less for a cumulative total of 15 minutes or more over a 24-hour period) with someone with COVID-19 you should quarantine for 14 days.

That means you should stay home for **14 days after your last contact with the person who has COVID-19.**

Even if you test negative for COVID-19 or feel healthy, you should stay home (quarantine) since symptoms may appear 2 to 14 days after exposure to the virus.
